

KRONOHOLDING AG

Reference letter

The concern KronoHolding has been cooperating with the general partnership Mazel M.H. Mazurkiewicz spółka jawna since as early as 1994.

Under this cooperation „MAZEL” manufactures for our plants in the territory of Poland, Russian Federation and Ukraine electrical power engineering installations and industrial automatics systems for wood processing technological lines.

So far the following projects have been implemented:

Polska - Żary

- Electrical systems on the premises of the plants:
 - boiler-house
 - drying- house
 - chip feeding
 - sawdust feeding
 - cutting machines
 - the MDF production line
- Lighting system of the hall room ASTRON-XVII
- Warehouse lighting system ASTRON XXIII and intermediate pumping station
- Technical warehouse lighting system
- Installing the lighting system of the premises area
- Cable line supplying the container defrosting house

Ukraine - Kamionka

- Electrical power engineering supply for the pipeline heating cable heating system, stage I and II
- Plant electrical system modernization
- Electrical system of the two Greecon system flap freezing circuits for drying drums

KRONOHOLDING AG

Russian Federation - Scharja

- System of supply and industrial automatic control systems for chipboard technological lines,
- Control systems for chipboard laminating lines,
- Supply and control system for floor and wall panel technological lines ,
- Control systems for the MDF lines

Under the above mentioned projects the company „MAZEL” produced the design, carried out the delivery and assembling works, did the start-up of AKPiA equipment and prefabricated elements. Furthermore, the company made the NN cubicles basing on the elements of the companies Moller, Siemens, SEW

Considering our mutual cooperation we wish to declare hereby that the high professional skills as well as the efficiency of „MAZEL” technical supervision make that, our cooperation has been very successful. Being fully aware and responsible we can recommend the company as an experienced, reliable and professional designer of electrical and power engineering works, who, owing to its perfect organization, and technical potential as well as the qualified staff can guarantee correct performance of the tasks assigned.
